

## Africa Energy Announces Luiperd-1X Test Results

VANCOUVER, BC, Dec. 7, 2020 /CNW/ - **Africa Energy Corp.** (TSXV: AFE) (Nasdaq First North: AEC) ("Africa Energy" or the "Company"), an oil and gas company with exploration assets offshore South Africa and Namibia, is pleased to announce drill stem test results for the Luiperd-1X well, the second major discovery on Block 11B/12B offshore South Africa. [View PDF version](#)

Jan Maier, Africa Energy's VP Exploration, commented, "The Luiperd discovery proves that the Outeniqua Basin offshore South Africa is a world-class hydrocarbon province that remains highly under-explored. Luiperd-1X intersected 85 meters gross sands of which 73 meters is net good quality pay in the main target interval and thicker than prognosed. The well reached total depth of approximately 3,400 meters on October 12, 2020, at which point the drill stem testing program was initiated. We are very pleased with the positive test results that show high condensate yield and excellent reservoir connectivity. These results confirm the joint venture's decision to proceed with development studies and to engage authorities about commercialization."

The Luiperd-1X well was opened to flow on November 1, 2020. After several tests at different choke settings, the well reached a maximum constrained flowrate through a 58/64" choke of 33 million cubic feet per day of natural gas ("MMcfd") and 4,320 barrels of condensate per day ("bcpd"), an aggregate of approximately 9,820 barrels of oil equivalent per day ("boepd"). The choke configuration could not be increased due to surface equipment limitations. The absolute open flow ("AOF") potential of the well is expected to be significantly higher than the restricted test rates.

Block 11B/12B is located in the Outeniqua Basin 175 kilometers off the southern coast of South Africa. The block covers an area of approximately 19,000 square kilometers with water depths ranging from 200 to 1,800 meters. The Paddavissie Fairway in the southwest corner of the block now includes both the Brulpadda and Luiperd discoveries, confirming the prolific petroleum system. The original five submarine fan prospects in the fairway all have direct hydrocarbon indicators recorded on both 2D and 3D seismic data and intersected in the wells, significantly de-risking future exploration.

Africa Energy holds 49% of the shares in Main Street 1549 Proprietary Limited, which has a 10% participating interest in Block 11B/12B. Total E&P South Africa B.V. is operator and has a 45% participating interest in Block 11B/12B.

### About Africa Energy Corp.

Africa Energy Corp. is a Canadian oil and gas company with exploration assets offshore South Africa and Namibia. The Company is listed in Toronto on TSX Venture Exchange (ticker "AFE") and in Stockholm on Nasdaq First North Growth Market (ticker "AEC"). Africa Energy is part of the Lundin Group of Companies.

### Important information

*Africa Energy is obliged to make this information public pursuant to the EU Market Abuse Regulation. The information was submitted for publication, through the agency of the contact persons set out above on December 7, 2020 at 1:00 a.m. Eastern Time.*
